

PORTA PHOTO ALBUM

<<< MEMO FOR USE >>>

► PORTA PHOTO ALBUM GENERATOR

The **PORTA** album generator version 1-04 est available as "common license" on the web site of his creator <http://www.stegmann.dk/mikkel/porta/> . Download [PortaSetup1_04.exe] . Launch this file and follow the usual procedure which is short.

► ALBUM FOLDER

Select the pictures for the album and set them in a folder [select].
By default, Porta will create the album in a sub-folder [album] of [select].
Our preference is the [Portfolio] folder containing both [album] and [select].

► LANCHING

Start *Porta* with *Porta.exe*, or by shortcut.
By default, Porta will use the last used options.

Go to the [select] folder. When chosen the name is displayed, push **OK**.

Main window of Porta :

Click on **change**, and select [album] in the folder [Portfolio]
If the sub-folder [album] has not been created yet, do it now.

- **Title** = The title which will be displayed in the foreword of the album.
By default Porta sets the name of the folder of the photographs. Choose a comprehensive and self explanatory title.
- **Footer** = Set the year and replace *Powered by Porta* by your own copyright name.

NB Never click on the start button before having completely achieved the tasks within the Options et Edit album sections.

OPTIONS

The first time the options are those of Porta. Then they are those of the latest album saved. For a customization, have a look at each of the possibilities of these options.

► EDITING

Edit album opens the editing window as hereunder :

Extract captions

The first time they are those of Porta. Then they are those of the latest album saved. It's defines automatic setting of captions or manual filling (see below).

Introduction and album link

- introduction = the text displayed when opening the album.
- album link = the link which is displayed over or aside the thumbnails column. it is not mandatory.

Order of the photographs

See the instructions

Major caption = the comment displayed under each picture of the album

Minor caption = the information displayed in the mouse hover box.

Previous / Next : to go to other pictures, or click on the thumbnails.

Close : When keyboarding is achieved, back to the main window. It is always possible to go back to editing.

► CREATION

Click on **start** lead irreversibly to the final stage. It is quick, 30 for 70 photos. When achieved, the "show album" button will display immediatly the album.
